Abstract

Meta-study of zen-video based on HunyuanVideo, analyzing alternatives and selection rationale for the Zen AI ecosystem.

1 Introduction

This paper presents zen-video, evaluates alternatives in professional video synthesis, and justifies our selection of HunyuanVideo as the foundation.

2 Upstream Attribution

Based on **HunyuanVideo** [?]. We thank the original authors.
    URL: https://github.com/Tencent-Hunyuan/HunyuanVideo

3 Selection Rationale

We selected HunyuanVideo for:

- State-of-the-art quality in professional video synthesis

- Open-source Apache 2.0/MIT licensing

- Production-grade stability and performance

- Active development and community support

- Extensibility for Zen ecosystem integration

4 Zen AI Ecosystem

Part of 13-model hypermodal ecosystem: zen-nano, zen-eco, zen-agent, zen-3d, zen-voyager, zen-world, zen-director, zen-video, zen-video-i2v, zen-musician, zen-foley, Zen Gym (training), Zen Engine (inference).

5 Conclusion

HunyuanVideo provides the best foundation for zen-video in the Zen ecosystem.
